

Meta Representation Learning for Continual Few-shot Event Detection

Anonymous EMNLP submission

Abstract

This document is a supplement to the general instructions for *ACL authors. It contains instructions for using the \LaTeX style files for EMNLP 2021. The document itself conforms to its own specifications, and is therefore an example of what your manuscript should look like. These instructions should be used both for papers submitted for review and for final versions of accepted papers.

1 Introduction

These instructions are for authors submitting papers to EMNLP 2021 using \LaTeX . They are not self-contained. All authors must follow the general instructions for *ACL proceedings,¹ as well as guidelines set forth in the EMNLP 2021 call for papers. This document contains additional instructions for the \LaTeX style files.

The templates include the \LaTeX source of this document (`emnlp2021.tex`), the \LaTeX style file used to format it (`emnlp2021.sty`), an ACL bibliography style (`acl_natbib.bst`), an example bibliography (`custom.bib`), and the bibliography for the ACL Anthology (`anthology.bib`).
